

Sandfield House,
Downham Market.
Norfolk.

April 2nd, 1944.

ANNUAL REPORT. 1942.

DOWNHAM URBAN & RURAL DISTRICTS.

There was no unusual incidence of infectious disease during the year, and generally speaking the health of the community was remarkably good.

DIPHTHERIA IMMUNISATION.

Returns up to Dec.. 31st, 1942. show percentage of children immunized to be :- under 5 years - Downham Urban District 46% . Downham Rural District 50% .

5 to 15 age group - Downham Urban District 90% . Downham Rural District 70% .

Efforts have been made to improve the figures for the under 5 years group.

SCABIES.

The prevalence of this complaint seems to be abating somewhat. Prior to the War and the influx of evacuees it was a comparatively rare disease in this area.

TUBERCULOSES. & VENEREAL DISEASE.

There seems to be no increase calling for special comment.

Yours faithfully,

M.O.H. Downham Urban & Rural Districts.
